

Legend to Supplementary Figure 1.

Lack of association of high serum parathormone (PTH) concentrations and Receptor Activator of Nuclear Factor kappa-B Ligand (RANKL) levels in systemic lupus erythematosus (SLE) patients (2496.75 ± 1597.87 vs 2390.43 ± 1299.32 pg/ml, ns). Lack of association of high serum PTH concentrations and osteoprotegerin (OPG) levels in SLE patients (164.94 ± 77.33 vs 156.60 ± 51.51 pg/ml, ns).
