

SUPPLEMENT 4. Feasibility, Impact, and Timeline Scoring Guide

Score	Feasibility	Impact	Timeline
1	<u>Low feasibility:</u> Item implementation faces many internal and external economic, technical, legal, and operational constraints that hinder achievability	<u>Low impact:</u> If implemented, the item will have a minimal to no effect on lupus communities, practices, organizations, and systems, and the impact will be short-term.	<u>Long timeline:</u> Item implementation will take more than 5 years.
2	<u>Moderate feasibility:</u> Item implementation faces some internal and external economic, technical, legal, and operational constraints that hinder achievability	<u>Moderate impact:</u> If implemented, the item will have a modest effect on lupus communities, practices, organizations, and systems, and the impact may be short term.	<u>Moderate timeline:</u> Item implementation will take between 1-5 years.
3	<u>High feasibility:</u> Item implementation faces few to no internal and external economic, technical, legal, and operational constraints that hinder achievability	<u>High impact:</u> If implemented, the item will have maximum effect on lupus communities, practices, organizations, and systems, and the impact will last for years to come.	<u>Short timeline:</u> Item implementation will take less than 1 year.
