LUPUS TREATMENT IN THE NEXT DECADE: THE NEXT
CUTANEOUS LUPUS

Discussion Points
- Interpreting the different skin manifestations in a patient with SLE
- Analyzing complications and differential diagnoses with other associated diseases

REFERENCES

Case 2: 28-year-old Caucasian female

Annegret Kuhn

A 28-year-old Caucasian female was diagnosed with systemic lupus erythematosus (SLE) in 1996 and presented with severe, erythematous, scarring discoid lesions on the scalp,
