

**Supplemental Table 1.** Comparison of Area under ROC between Risk Calculators among patients **Age ≥ 40 years (n=158)**

	<b>Area under ROC</b>	<b>Asymptotic Significance</b>	<b>95% CI</b>
QRISK3 >10%	0.60	0.053	0.50 - 0.65
ASCVD >10%	0.53	0.57	0.43 - 0.64
FRS >10%	0.53	0.58	0.48 - 0.63
Modified FRS >10%	0.55	0.33	0.45 - 0.65
High-risk PREDICTS	0.64	0.004	0.54 – 0.73

ROC = receiver operating curve; CI = confidence interval; ASCVD = Atherosclerotic Cardiovascular Disease; FRS = Framingham Risk Score; PREDICTS = Predictors of Risk for Elevated Flares, Damage Progression, and Increased Cardiovascular Disease in Patients with SLE.
